

Professional Networking & Certification Preparation

NEXCORZ offers practical, lab-based training for students, network engineers, ISP teams and enterprise IT professionals. The focus is on real deployment, troubleshooting, configuration practice and certification preparation through industry-relevant scenarios.

Courses Offered

MTCNA - MikroTik Associate

Foundation training for MikroTik RouterOS and everyday network administration.

Key coverage:

RouterOS basics, IP addressing, DHCP, DNS, NAT, firewall basics, routing, bridging, wireless basics, hotspot, queues, monitoring and backup.

MTCRE - MikroTik Certified Routing Engineer

Advanced MikroTik routing training for ISP and enterprise routing environments.

Key coverage:

Static routing, dynamic routing concepts, OSPF, routing filters, tunneling, inter-network connectivity, route troubleshooting and policy-based design.

CCNA - Cisco Network Associate

Core networking training for those building strong Cisco and enterprise fundamentals.

Key coverage:

Subnetting, switching, VLANs, trunking, STP, EtherChannel, routing concepts, ACLs, NAT, wireless basics, security fundamentals and troubleshooting.

CCNP - Cisco Network Professional

Professional-level enterprise networking preparation for advanced network engineers.

Key coverage:

Advanced routing and switching, OSPF, EIGRP and BGP concepts, redistribution, route control, enterprise services, design thinking and troubleshooting.

Training Modes

- On-campus training
- One-to-one training
- ISP and enterprise customer-premise training
- Online training
- Corporate/team training

Best For

Students starting a networking career, junior and mid-level network engineers, ISP technical teams, IT support staff, system administrators, enterprise IT teams and professionals working with MikroTik, Cisco, Fortinet and Microsoft 365 environments.

Additional Courses Offered

Fortinet NSE 4 - FortiGate Security

Firewall and network security training focused on FortiGate deployment, operations and troubleshooting.

Key coverage:

Firewall policies, NAT, routing, VPN, security profiles, web filtering, application control, logging, reporting, high availability concepts and practical troubleshooting.

Microsoft 365 Administration

Cloud productivity and administration training for modern workplace and IT support teams.

Key coverage:

Microsoft 365 admin center, users, groups, licensing, Exchange Online, Teams, OneDrive, SharePoint basics, identity basics, security settings and tenant administration.

Why Choose NEXCORZ

- Practical lab-based training instead of theory-only learning.
- Real-world scenarios from ISP, enterprise network, cloud and security environments.
- Guidance from experienced certified professionals across networking, systems, cloud and cybersecurity.
- Strong focus on routing, switching, firewall, VPN, bandwidth management, Microsoft 365 administration and troubleshooting.
- Customized training plans for individuals, companies, ISP teams and enterprise IT departments.
- Certification preparation with hands-on configuration practice and interview-ready concepts.

Ready-to-Use Website Copy

Build your networking, cybersecurity and cloud administration career with NEXCORZ. Our training programs include MTCNA, MTCRE, CCNA, CCNP, Fortinet NSE 4 and Microsoft 365 Administration. Each course is designed around practical labs, real network scenarios, troubleshooting practice and certification preparation for students, professionals, ISP teams and corporate IT departments.
